

GNB-CPR All	Group of Notified Bodies for the Construction Products Regulation (EU) No. 305/2011	NB-CPR/All-17/158 Issued: 18 August 2017 Information
------------------------	--	--

New citations of harmonised standards in OJEU

On 11 August 2017, the below new harmonised standards or new versions of harmonised standards were cited in the Official Journal of the European Union (OJEU) No. 2017/C 267/04 – [See direct link](#).

Standard Number	Title	Transition period		SG/SH
EN 998-1:2016	Specification for mortar for masonry — Part 1: Rendering and plastering mortar	11.08.2017	11.08.2018	SG02
EN 998-2:2016	Specification for mortar for masonry — Part 2: Masonry mortar	11.08.2017	11.08.2018	SG02
EN 15681-2:2017	Glass in Building — Basic alumino silicate glass products — Part 2: Product standard	11.08.2017	11.08.2018	SG09

Restrictions

A restriction has been introduced for the standard EN 15681-2:2017, Glass in Building — Basic alumino silicate glass products — Part 2: Product standard: *The third sentence of Clause 4.2.2.10 is excluded from the scope of the reference published.*

Transition

During the transition, both the old and the new versions of the standards are applicable as harmonised standards. After the transition period only the new versions can be applied.

Errors in the Official Journal

For the standards EN 998-1:2016 and EN 998-2:2016, the Official Journal erroneously indicates 31 August 2018. No end of the coexistence period is indicated.

The information about the transition period indicated in the above table is found in the NANDO database.

The Commission has indicated that the information found on NANDO is correct. Hence, Notified Bodies are kindly requested to disregard the erroneous information in the Official Journal and anticipate its correction.

IMPORTANT NOTICE FOR NOTIFIED BODIES:

The notification scopes of notified bodies are no longer automatically updated when harmonised standard are amended and/or new versions are cited.

Each notified body will need to apply with its notifying authority to have the new versions included in their scope of notification!

After the end of the transition period, bodies which have not obtained notification for the new versions will no longer be notified bodies for the harmonised standards in question.
